PROFESSIONAL SUMMARY

Purposeful MIS Executive and Data Analyst with 2+ years of experience managing end-to-end data operations across NGO and corporate sectors. Proficient in Advanced Excel, Power BI, SQL, and Kobo Toolbox, with a strong record of transforming raw field data into actionable MIS reports that support decision-making. I am skilled in data collection, cleaning, analysis, and cross-departmental coordination. Currently contributing to development programmes covering Livelihoods, Gender Empowerment, WASH, Health, Education, and Disaster Management across multiple Indian states.

TECHNICAL SKILLS

Advanced Excel: Pivot Tables, Power Pivot, VLOOKUP, XLOOKUP, INDEX-MATCH, COUNTIFS, SUMIFS, IF/IFS, Flash Fill, SUMPRODUCT, Power Query, Data Validation, Conditional Formatting, MIS Reports, Data Cleaning, Charts & Graphs

Power BI: DAX (CALCULATE, SUMX, FILTER, TOTALYTD), Power Query, Data Modeling, Relationships, KPI Cards, Slicers, Interactive Dashboards, Automated Reporting

SQL: SELECT/WHERE, GROUP BY, HAVING, INNER JOIN, LEFT JOIN, Subqueries, Aggregate Functions (SUM, AVG, COUNT, MAX), Database Design, Foreign Keys

Tools & Platforms: Kobo Toolbox (Form Design & Data Collection), Basecamp, Google Workspace, Microsoft Office Suite

Core Competencies: MIS Reporting, Master Sheet Management, Data Refinement & Verification, Field Data Operations, Cross-departmental Coordination, ETL Processes, Policy Management, Insurance Data Processing

WORK EXPERIENCE

Management Information Assistant (MIS)

Mar 2025 – Present

Pragya – Development Organisation | Gurugram, NCR

Non-profit organization working across India, Nepal, Bangladesh & Kenya in development sectors.

Data Collection & Management:

- Collect daily field-level data from Kobo Toolbox, Basecamp, and official email across all India-based projects.
- Managed and monitored data for 20+ projects across multiple Indian states. covering Livelihoods & Food Security, Gender Empowerment, Disaster Management, Natural Resource Management, WASH, Education, and Health & Nutrition
- Refine and clean raw field data to ensure accuracy, consistency, and completeness before processing.
- Maintain and update Master Sheets for all ongoing India projects across Head Office and Regional Offices • Perform manual data entry from physical attendance sheets into Excel spreadsheets.

Reporting & Analysis:

- Analyze Programme data using Pivot Tables to identify trends, track progress, and generate actionable insights.
 - Generated 50+ weekly and monthly MIS reports for Programme and management teams
 - Generate customized reports for multiple departments as per their requirements and deadlines
- Inter-Departmental Coordination:**
- Coordinate with all departments of Head Office and Regional Offices across India via email and phone for timely data collection, clarification, and reporting.
 - Function as the midway point of contact between field teams, regional offices, and head office for all MIS-related communication

- Consult with Programme, Finance/Accounts, M&E, HR, and Operations departments to ensure smooth data flow and reporting.

Tools & Technology:

- Apply Advanced Excel functions, standard formulas, and Power Query for data processing, automation, and report generation.
- Design and create Kobo Toolbox digital forms for structured field data collection, reducing manual errors and simplifying reporting for field staff.

Monitoring and Coordination Support Assistant (MCS)

Jan 2025 – Mar 2025

Pragya – Development Organisation | Gurugram, NCR

- Coordinated with field staff deployed across project locations for scheduling and planning.
- Prepared daily and weekly Work Plans for field staff, specifying responsibilities, targets, and locations.
- Collected and verified field staff attendance records and submitted them to the Accounts team for salary processing.
- Maintained communication with field teams to track movement and ensure timely execution of field activities.

MIS Executive

Apr 2024 – Dec 2024

Vidal Health Insurance TPA | Corporate Sector

- Managed health insurance policies for 10+ corporate clients simultaneously
- Collected and processed data from PDFs, Excel sheets, CSV files, and company portals
- Cleaned, verified, and formatted large datasets according to company standards before system upload.
- Created and updated insurance policies based on policy terms, conditions, and client requirements.
- Generated employee health insurance cards and maintained accurate policy records.
- Managed employee additions, deletions, and modifications within insurance policies
- Coordinated claim processing and assisted in resolving policy and claim-related issues.
- Ensured data accuracy, timely uploads, and smooth coordination between clients and internal teams.
- Worked extensively with Excel and internal portals for data management and reporting.

PROJECTS

Sales Analytics Dashboard | Excel + Power BI

- Created dynamic, interactive dashboards to track revenue, profit %, and YoY growth.
- Applied Power Query for ETL data transformation and advanced DAX formulas for data modeling and KPI calculations
- Enabled real-time business insights into management reporting.

AE Phase II – Crops Data Dashboard | Power BI

- Developed an interactive Power BI dashboard for monitoring crop-related data under AE Phase II project at Pragya.
- Consolidated and cleaned data from multiple Excel sheets using Power Query; built data models for multisource reporting.
- Used DAX formulas for KPI calculations, percentages, and performance tracking.
- Designed interactive slicers, charts, and filters for easy management review.
- Automated reporting to reduce manual work and improve accuracy.
